

Elbe One

Now in Beautycase and Wheeler format!

Hamburg, March 2010

Elbe One is travelite's highly impact resistant and lightweight hard-side luggage line made of Polycarbonate, kept in metallic shades protected by our special surface protection emboss.

The range line-up of three trolleys (4-wheel sizes 76cm/66cm and a 52cm boardtrolley with two wheels) is now to be complemented by the addition of a beautycase and a business wheeler.

The new beautycase comes equipped with many compartments and dividers, as well as a separate pouch. An elastic string on the back makes it trolley compatible. A separate TSA padlock for trouble free U.S. travelling is also included.

The new business wheeler also comes fully optioned, including a file organizer, a laptop compartment for laptops up to 17" in size, a separate overnight compartment for a change of clothes, a built-in TSA combination lock, an internal Aluminium handle system and XL comfort design wheels. As the beautycase, the wheeler is trolley compatible, with an integrated sleeve elastic on its backside.

The beautycase will be available from our partner retailers as of April, the wheeler as of May.
